

- DESCRIPTION.**

Metallic rugby goal made according to the rugby and recreation regulation (**NIDE Rugby**).

Structurally, it consists of two 12,00 meters vertical posts, joined through a 5,60 meters crossbar; manufactured of round tubes with 120 and 90 millimeters diameter through an extrusion process (which gives it an inner rib that provides great resistance), mechanized by laser and joined with screws. These unions do not present any problem because they are totally hidden.

The whole equipment is anchor to a concrete foundation with the minimum values of (1,20x1,20x1,20) meters in order to fulfill the current regulations. The depth of the post will be of 1,00 meters measured from the field and will be inside a PVC pipe sheath.

In order to constantly improve the quality of our products, Euronix reserves the right to modify any of the technical characteristics.
