

## ● DESCRIPTION.

It is manufactured according to **UNE EN 749 regulation** and designed for be installed in any surface.

Structurally, it is formed by the frame and the stabilization system.

The frame is composed of a square crossbar and two square posts of 80 mm section leaving inside measures of (3x2) meters. At the back they have rods to hold the net.

The stabilizer system is composed of a top arch and a bottom arch (with a zinc treatment), that give it the stability, rigidity, and consistency that the goal requires, and will help to hold the net.

All elements except the frame and the base are rounded to avoid unnecessary physical hazards.
