- EUROSCHOOL MINIBASKET WITH ANCHORAGE BASKET HOOP.

The **EUROSCHOOL MINIBASKET WITH ANCHORAGE** basket hoops which have a 1,00 meters cantilever, are made according to the guideline, and are designed to be able to install in whatever exterior surface.

They are made fundamentally of:

- Structure and anchorage to the ground.
- The frame stabilization system and basket hoop frame.

In order to constantly improve the quality of our products, Euronix reserves the right to modify any of the technical characteristics.

○ **Structure and anchorage to the ground.**

It's made of two 100x100x3 square profiles. The arm is joined to the foot by a screwed joint, through a Steel conformed "U" that fastens to the foot on all three sides of the profile: thus allowing the regulation in height and increasing the resistance of the joint.

The foot of the basket hoop is fixed by a plate and 4 reinforcement squares. The plate is screwed to the anchorage provided by Euronix, on this way the equipment acquires a totally fixation, stability, and rigidity.

In order to constantly improve the quality of our products, Euronix reserves the right to modify any of the technical characteristics.

- **Frame stabilization system and basket hoop frame.**

The basket frame is fully established by two stiffeners made of a pair of adjustable tubes that joins the structure with the frame, guaranteeing 100% the straightness of the board, obtaining the desired perpendicularity with respect to the ground.

In addition, **the basket frame is 1200mmx900mm according to the guideline** and it is joined to the basket arm through a screwed joint.

The frame has two angles welded at the back ensuring the resistance of the equipment, and at the front the rim and the net fully normalized.

- **Materials.**

Element	Specification
Profiles / Plates / Frame	S235 JR y S275 JR Steel
Screws	Zinc (Zn) Quality 8.8
Net	Natural or synthetic fiber
