

- DESCRIPTION.**

It is a pack of three circular substructures manufactured with metallic profiles.

Each substructure is covered with an aluminum sheet with 4 hollows to facilitate their transport and there are disposed Damero aluminum sheets (plates with small reliefs) such as ground, that apart from giving it a great aesthetic, will make an anti-sliding surface.

The dimensions of the cylinders allow the easy storage by stacking one inside another, thus occupying minimal space.

Ref.	Finish	Dimensions (m)	Weight (Kg.)
EEP014	Aluminium	1 bag of 0,50x0,90x0,90	44,72
