

- **DESCRIPTION.**

Structure made of curved profiles of hot-dip galvanized steel; very resistant to wet and outdoor spaces.

Due to its design, the sled-ground contact surface is total, making it stable and manageable during physical exercise. In addition, it has a bracket and enough dimensions to place weight discs with different sizes, and with a fastening point to place the drag strip that will be attached to the waist.

For all this, it is ideal for physical resistance training.

Ref.	Dimensions (m)	Weight (Kg)
EFC004	1 bag of 0,30x0,37x0,75	2,54
